January 6th, 2021

To Whom it May Concern:

Musafer Rasho has been living in Serres camp and helping out as a Kurmanji / English translator from August 2020 to the present time, and during this time he supported our organisation greatly in the following aspects;

- Translating group training materials, messages, flyers, information from English to Kurmanji on a regular basis to help us reach out more efficiently to the population in the camp.

Musafer Rasho has been a dedicated and involved affiliate to our organisation during their time in the camp, and has continuously helped us in all the ways mentioned above. He is hardworking and reliable, and constantly shows compassion, patience, and creativity when working with our team and other members of the camp.

Musafer helps with the transition and communication between the LHI team, the wider community, and camp residents, in particularly new arrivals to the camp.

Further, the LHI team appreciated Musafer constructive communication skills, positive attitude and friendly personality. I wish Musafer the best in his new country of residence, and hope he is able to continue his studies or work.

Sincerely,

A handwritten signature in black ink that reads "HSmith". The signature is written in a cursive, flowing style.
